# SOMETHING NEW

Once in a while one has the good fortune to meet a man who has been hybridizing for his own pleasure. It was our good fortune to meet James Sohar a few years ago at one of our Ohio State shows. He had nearly a whole table full of nice seedlings on display — the kind you could not help but notice.

He has repeated this same thing at other Ohio State shows and when he brought in more beauties this year, we suggested to him that he introduce some of them. He was interested but at the same time was aware of what he was facing — an unknown hybridizer bringing out varieties that had not even been in the test gardens, and had

not been shown except locally.

My answer was that any time you get a blue ribbon in the seedling section at one of our Ohio State shows, you must have something that is better than anything now on the market. Every one of those we list below has had one or more blue ribbons at our shows. After seeing them as often as I have, I do not hesitate to recommend them to you as worthy of your serious consideration. The ratings given are from ordinary field growing — not special plantings for show purposes.

With these remarks, we offer the following new ones for 1960:

## **BONNIE LEE      1960      75 days      Class 442**

(Elizabeth the Queen x Pink Seedling)

Something a bit different in an early shrimp pink. The creamy throat mark on the lip petals has a few pink stripes giving the effect almost of a solid pink. Its waxy texture, plus heavy ruffling gives a floret that holds well and the 50"-54" spike supports a 25" flowerhead with ease. Florets will average about 4½", 6-9 open out of 20-22 buds with enough in color to give a nicely balanced spike. Reminds one very much of Elizabeth the Queen in its performance. A good exhibition glad at the present, with more than ordinary commercial possibilities.

## **BUTTERNUT      1960      85 days      Class 520**

(Astrid x Yellow Seedling)

Might be of more interest to a commercial grower than a fancier, but its performance record is such that it could be a good show flower. Light buff or maybe a rich cream, something a bit different from anything we now have. The lower petals are embellished with a rose spear. Florets are nicely ruffled, like leather in texture, and have a delightful waxy sheen. 18-20 buds on a 55"-60" spike, with 6 to 8 florets 5½"-6" in size open on a 25" flower head. Strong sturdy stems with excellent facing and placement. Seems to do well in any kind of weather, wet or dry, and it is healthy and a good propagator.

## **FIELD MARSHAL      1960      85 days      Class 430**

(Elizabeth the Queen x Silver Wings)

Mr. Sohar's girls call this the Hedge because it makes such a thick high row. Light salmon florets, shading deeper toward the edges of the petals, with a rose brush mark in the throat, touched lightly with a cream spear. Maybe a touch of pink in the salmon. Tall to extra tall straight spikes that open well when cut tight. Easily holds 6-8 open florets on a 25"-27" flowerhead. 20-22 buds. Florets are ruffled and well attached. For a commercial grower, nearly every large bulb will produce two extra nice spikes and I am wondering what it would do for the fancier who de-eyed the bulb. Good parents give it a good background.

## **FRANCIS      1960      80 days      Class 550**

(Elizabeth the Queen x Spitfire)

As near as I can tell you, this is a frosty rose-lavender with a cream spot on the lower

petals. It's a hard color to describe, but a beauty when you see it. There are deep rose lines on the throat marking. A real good exhibition and an excellent commercial prospect. Florets will average 5½" in size six plus open, 18 to 20 buds, making consistently a well balanced spike. They are well placed and attached. Spikes open well when cut tight. Good propagator. Comes from two parents that have lots of winnings.

**OHIO BELLE      1960      70 days      Class 450**

**(Parentage unknown)**

Unusually early—something the commercial men are looking for to supplement the present white and pink they now have. OHIO BELLE is a light rose with a deeper rose colored brush mark on the lower petals. Florets are beautifully ruffled, a texture like leather, six to eight open on a 18-20 bud spike that will average five feet tall. By the time the first two or three florets are open, practically the entire spike will show color. Placement and attachment excellent, healthy and a good propagator. Makes lots of jumbo bulbs with most of them making two good spikes. An extra good commercial prospect.

**RED BANNER      1960      80 days      Class 448**

**(Drum Major x Margaret Beaton)**

A large butterfly type floret — scarlet red with a slightly deeper spot on the lower petals. A very useful addition to this color class. Six to seven lightly ruffled florets are open on a 50"-54" spike. 18 to 20 buds make the spike well balanced. Strong spikes — an easy cutter, healthy and a good propagator. The florists take every one and cry for more.

**RED WARRIOR      1960      80 days      Class 558**

**(Astrid x Drum Major)**

Give this to Dr. Hamilton, Sebesy, Cook, Schrimpf Bros. or any of the top exhibitors and they will have a Grand Champion from RED WARRIOR. Classed as black red, but not real black red — dark enough to come in the black red class however. The small rose blotch on the lower petals lightens the dark red effect and takes it out of the solid color class. Florets six inches or better, ruffled, heavy texture, and extra well attached. Spikes will average 54" to 60", 20 buds and a 27" flowerhead. Has Grand Champion possibilities for it makes an eye-full of color. Strictly an exhibition glad.

**SERENATA      1960      85 days      Class 440**

**(Elizabeth the Queen x Spitfire)**

Pink and white — a ruffled blush pink floret, shading slightly deeper at the edges with a light cream throat. Better than average for long spikes — five foot ones are common, 25" to 28" flowerhead of 18 to 20 buds. Will hold six to eight ruffled crinkled florets open with excellent balance throughout. A very easy cutter, sturdy long spikes, excellent attachment. Better than average commercial and show prospect. Good parents. Reminds one a great deal of well grown Apple Blossom.

*These are not just the usual run of new seedlings — they have all been proved on the wholesale market for a number of years. We do not hesitate to recommend them to you.*

**PRICE OF THE ABOVE VARIETIES—Large \$1.50 each, ten for \$12.00; Medium \$1.00 each, ten for \$8.00; Small 75c each, ten for \$6.00.**

**SPECIAL — One large bulb of each of the above, \$10.00 (a \$12.00 value).**

**THREE LARGE BULBS OF EACH OF THE ABOVE, \$25.00**

*Growers units prices on request.*

**VIOLET CHARM** — A show winner in a soft violet with a blue throat **2/30c**

### SHIPPING

We can ship express practically any time within reason, but most parcel post orders are shipped in March or April. If you want your order early, have it shipped by express. Help us by showing the approximate date you want to get your bulbs. You know your local conditions better than we do — so help us that way.

### PLANTING INSTRUCTIONS

Planting instructions will be included with all shipments. This will be the latest up-to-date information available, written by experts — published by the North American Gladiolus Council.

### SUBSTITUTIONS

We might as well be frank on the substitution situation. No one likes to substitute and no one likes to get a substitution, but there are certain limitations that are hard to overcome. A small 25c item that we cannot fill on an order makes it prohibitive to refund, and we would probably substitute. We will not substitute on anything but small items. On the early orders there is seldom any reason to substitute and we do not run into much trouble until the middle or end of March. After that time it becomes increasingly difficult to fill all items as or-

**VERA** — Light lavender with a ruffled floret 8 open. A potential show champion and an excellent commercial **25c**

**VIOLET DICKINSON** — Crisp lightly ruffled white with a lavender feather **2/30c**

**WEDGEWOOD** — A delightful combination of lavender and cream **2/30c**

**WHITE BUTTERFLY** — Small white rather plain miniature **2/30c**

**WHITE FRIENDSHIP** — The white sport of Friendship that is comparable to the performance of Friendship. MEDIUM AND SMALL SIZES ONLY **35c**

**WHITE GODDESS** — A good consistent performer in white and cream **2/30c**

**WHITE LACE** — An early white that is a beauty. Not too big but its beauty offsets that **2/30c**

**YELLOW BIRD** — A miniature yellow that is hard to beat **2/35c**

dered. Therefore, on all orders received after March 16th, unless you specifically request us not to do so, we will substitute size, but not varieties. After April 1st we will substitute size first and then varieties. You may be sure of one thing, though, we will give better value in the substitution than the one originally ordered.

### SALES TAX

We have been advised by the State Tax Commission that we will have to collect 3% sales tax from all Ohio customers. Please include the amount with your order unless you have an exemption certificate. PLEASE NOTE THIS APPLIES TO OHIO CUSTOMERS ONLY.

### MARKERS

We have located an aluminum marker that seems to fit our needs to perfection. You can write the name on one side and other information on the other side and still read both items several years later. We have been using them for several years and feel that they are worth while offering to all growers. Write for free sample if you are looking for a real good marker or better yet, order 50 for only 75c. They come complete with wires — 50 to a box. The price makes them a good investment when you consider their permanence.

To illustrate, supposing the bulb you pick out is priced at 35c for a large bulb, you can get 10 large bulbs for \$2.80; for a medium bulb, the price would be 25c or 10/\$2.00 and small bulbs would be 2/25c or 10/\$1.00. Bulblets would be 10/35c. For quantity prices see quantity price list.

Please make checks payable to Erie Shore Farm, Inc.

**NOTE —** This price list is made up before our stock is cleaned and counted. If any reductions are made in the prices at the time of our spring list, we will adjust your fall order accordingly.

## TRANSPORTATION

One of our big expense items is postage and express on our orders. We have concluded that it is best for each to pay their own transportation charges, then the man living close by is not paying part of the cost of transportation for the man living a long way away.

Will you therefore please include postage with your remittance. Help us to help you by keeping our prices down as low as possible, consistent with good quality.

To figure your postage on an order, count the number of large, medium and small bulbs you have ordered and use the table below, i.e., fifty large bulbs packed for shipment would weigh about 8 pounds, 25 medium bulbs would weigh about 2 pounds. We will include extras if you miss your estimate by a small amount, or we will refund any sizable overpayment. Madison is about 40 miles east of Cleveland, Ohio.

## GUARANTEE

*We guarantee our bulbs to be true to name and free from disease or thrip. If any of our bulbs are found not to be as represented, we will either refund your money upon their return or we will replace the unsatisfactory stock. We cannot, at any time, be responsible for more than the original amount paid for the bulbs. Due to conditions beyond our control, we are not responsible for the growth of bulbs or bulblets. All orders are placed with this understanding.*

*Please open package immediately upon its receipt. Examine carefully and if not satisfactory, advise us at once. We admit we make mistakes once in a while, but we are ready to adjust them without complaint. Both in field and the bulbs in storage have been state inspected, which, with our own rigid inspection, makes us feel sure of our stock.*

## EXTRAS

Each year we put a note in the catalogue, asking that you mention an extra or two that you might like to receive. We can't always give you what you might like, but the mention of an extra at least helps us to decide what you are interested in.

There has been considerable talk among the growers of doing away with the giving of an extra. In fact, some growers are doing this right now but for our part the idea of putting an extra in the order is two-fold — one, to give you a chance to look at some variety we think is extra nice, and second, to sort of say "thank you" for your order. So — please list a few names of some varieties you might like to have — it will help us ever so much.

## HOME GARDENER'S SPECIAL

This special is designed for people who are not particularly interested in exhibiting glads at the shows. It gives you considerable leeway in making a choice of some of the better varieties. You get ten of a kind, labeled and bagged separately, and have your choice of any ten varieties you might like — miniature or large. There is a considerable saving over the regular catalogue price. Your choice of colors and sizes.

### GARDEN MIXTURE

We always seem to have quite a call for our GARDEN MIXTURE. This is a mixture made up as your order comes in and it can be made up in light or dark colors if you prefer it that way. Ordinarily, the mixture will include a complete run of colors. Naturally, none of the varieties will be named and they will be all mixed up in the bag. They will be nice clean bulbs, healthy and ready to produce for you a good assortment of colors during the entire blooming season. This Garden Mixture should be particularly useful if you are not interested in named varieties.

PRICE — 100 large bulbs \$5.00 — 50 for \$2.75 — 25 for \$1.50

100 Medium bulbs \$3.00 — 50 for \$1.65 — 25 for \$1.00

If you want your mixture of miniatures only, please tell us when you order.
